19" - Universal Gateway
The Gateway solution for your business

MBS
Made by Specialists.

19" Gateway
Increase your productivity not only today also for future demands

The MBS 19" Gateway with its 30,000 data points combines performance, reliability, flexibility, security and integration capabilities in one device. The optimization of data flow allows real-time transmission with large amounts of data with high transaction volumes that are typical in demanding applications. Controlling, Administration and security functions are handled centrally via the 19 " in order to achieve a high level of functionality and a very simple administration. With its numerous communication protocols the 19" offers almost for every requirement the right solution. On request also manufacturer-specific communication protocols can be implemented.

19" - Universal Gateway
Specifications*

19"

Approximately 60 protocols
(z.B. BACnet/IP, BACnet/PTP, BACnet MS/TP,
BACnet Router, Gateway to: EIB, MODBUS/
Serial, MODBUS/TCP, M-BUS, OPC, ESPA 4.4.4,
IEC60870, etc)

Up to 30,000 data points

Integrated web server for configuration

Communication Interfaces:
2x LAN 10/100/1000 MBit/s Ethernet
2x RS232 DSUB-9
4x USB
RS485 via converter (optional)

Internal hard drive

Specification
Power consumption: 80 watts
Weight: 13Kg
Dimensions: Height: 177mm, Width: 481, Depth: 321
Ambient temperature: 0...45°C, 32...113°F
Ambient humidity: 20...80 percent relative humidity, non-condensing
Assembly: 19" industrial PC for cabinet installation, 4HE
